PROFESSIONAL EXPERIENCE

Software Engineer | *React, JavaScript, Redux, REST APIs, Jest, React Testing Library, Git*

SaayamForAll *Feb '26 - Present*

- Develop React and Redux features for beneficiary dashboards and service-request workflows, integrating REST APIs for data retrieval, filtering, pagination, sorting, and state management.
- Implemented an AI-assisted "More Information" chat workflow with API integration, question limits, cooldown logic, and automated tests using Jest and React Testing Library.
- Built voice-recording and speech-to-text workflows supporting transcript generation, editing, and request submission.
- Expanded multilingual UI support across 12+ languages using react-i18next, replacing hardcoded strings and mapping backend enum values to localized labels.
- Integrated backend services for Contact Us and related workflows, including AWS Lambda-backed functionality and reCAPTCHA v3 validation.
- Resolved responsive UI issues, data-mapping defects, and production regressions; contributed to test maintenance, snapshot updates, pull-request reviews, and release validation.

Software Engineering Intern | *Python, Flask, React, SQL, Docker, GCP, Git*

BirthdayMessaging.io *May '25 - Dec '25*

- Developed Flask REST APIs for authentication, user management, SMTP configuration, email testing, and message-template workflows.
- Built responsive React interfaces for contact management, analytics dashboards, template management, and account administration.
- Performed API validation, SQL troubleshooting, and root-cause analysis using Postman and MySQL.
- Implemented encrypted SMTP credential management using Python cryptography and Fernet; containerized services with Docker and supported GCP deployment workflows.

ACADEMIC PROJECTS

SentinelAI- AI-Powered Intellectual Property Protection Platform | *Python, FastAPI, PostgreSQL, React, AWS S3, Docker*

- Developed a full-stack AI-powered platform using React and FastAPI to identify potentially infringing images through similarity analysis.
- Integrated REST APIs for image upload, analysis, match retrieval, and report generation.
- Combined CLIP embeddings and perceptual hashing to identify visually similar images, achieving approximately 85–90% detection accuracy under the project's evaluation criteria.
- Built React dashboard and reporting workflows for reviewing image matches and similarity-analysis results; designed PostgreSQL schemas to store image metadata and analysis results.
- Integrated AWS S3 storage and Docker-based containerization to support application development and deployment

AI Job Assistant Copilot | *Next.js, React, TypeScript, Tailwind CSS*

- Built responsive, reusable React components for an AI-powered job assistant, including a multi-step profile setup wizard for skills, target industries, and salary preferences.
- Developed resume parsing and resume-score interfaces, structuring frontend workflows for integration with backend AI services.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), TypeScript, SQL
Computer Science: Data Structures, Algorithms, Object-Oriented Programming
Frontend: React, Redux, HTML5, CSS3, Tailwind CSS, Material UI, i18next
Backend & APIs: FastAPI, Flask, REST APIs
Databases: PostgreSQL, MySQL
Cloud & DevOps: AWS (S3), GCP (GKE), Docker, Kubernetes
AI & Developer Tools: Claude, Cursor, Codex
Testing & Tools: Functional Testing, API Testing, Regression Testing, Selenium WebDriver, TestNG, Postman, Git, JIRA

EDUCATION

Masters of Science in Computer Science - San Francisco Bay University, Fremont, CA
Bachelor of Science in Computer Science - Fergusson College, Pune, India
